7. Best Practices

Introduction

The Competition Account Manager helps you manage golf competition accounts by:

- Importing and tracking financial transactions from CSV exports
- Organising competitions into presentation seasons
- Tracking competition results for singles and doubles competitions
- Automatically linking prize money payments to competition results
- Calculating accurate Competition Pot balances with weekly summaries
- Distributing winnings at presentation night and recording competition costs

This guide covers all three main views of the application.

Navigating the Application

The application has three main views, accessed via the navigation buttons at the top of the page:

- **Competition Accounts** — Financial and transaction management (CSV import, weekly summaries, flagging winnings)
- **Manage Competitions** — Competition and results management (CRUD, results entry, season management)
- **Presentation Night** — End-of-season winnings distribution and competition costs

Click the relevant button to switch between views. Your data persists across view changes.

Competition Accounts View

This is the primary financial view. It handles everything related to transaction data.

Importing Transaction Data

1. Click **"Choose File"** and select your CSV export
2. Click **"Import CSV"**

3. Wait for the success message — the Transformed Records table will populate

CSV file format required:

```
Date,Time,Till,Type,Member,Player,Competition,Price,Discount,Subtotal,VAT,Total
```

Example row:

```
26-08-2025,18:19,Till 1,Topup (Competitions),Alastair REID,,October Medal,50.00,0.00,50.00,0.00,50.00
```

Database Operations

The toolbar provides buttons for managing the underlying database:

- **Save to DB** — Persists imported records to the server database
- **Load from DB** — Reloads records from the server database
- **Clear DB** — Removes all records (use with caution)
- **Download CSV** — Exports current records as a CSV file

Transformed Records Table

After importing, the full transaction list appears here. Each row shows:

- Date, time, member name, competition name, amount
- A flag icon if the transaction has been flagged as a competition winning

Weekly Summary Table

Below the records table is the **Aquarius Golf-Competition Transaction Summary**. This shows a week-by-week breakdown including:

- Total income for the week
- Competition Pot running balance
- Flagged winnings paid out that week

Click any week row to open the **Weekly Drill-Down** for that week.

Weekly Drill-Down

Clicking a week in the summary table expands an inline drill-down panel showing all transactions for that week. From here you can:

- See each transaction with its current flag status
- **Flag a transaction as a winning** — click the "Flag for Winnings" button on any unflagged transaction
- **Edit an existing flag** — click "Edit Flag" on a flagged transaction
- **Remove a flag** — click "Remove Flag" inside the Edit Flag modal

The drill-down updates immediately after any flag/unflag action without requiring a page reload.

Flagging Transactions as Winnings

Flagging links a prize payment transaction to a specific competition result.

To flag a transaction:

1. Open the Weekly Drill-Down for the relevant week
2. Click **"Flag for Winnings"** on the transaction row
3. A competition selection modal appears showing tiles for all available competitions
4. Click the competition tile that matches this prize payment
5. The system records the flag and updates the drill-down view

To edit or remove a flag:

1. Click **"Edit Flag"** on a flagged transaction row
2. The Edit Flag modal opens showing the current competition assignment
3. To change the competition, select a new tile
4. To remove the flag entirely, click **"Remove Flag"**
5. The drill-down updates immediately

Notes:

- Only one competition can be linked per transaction
- Swindle money is auto-populated from flagged transactions where applicable
- The Competition Pot balance recalculates automatically after flagging

---

Manage Competitions View

This view handles all competition and results management. It does not deal with financial transactions.

Managing Presentation Seasons

What is a Presentation Season?

A presentation season groups competitions by their award presentation period. Seasons follow the format:

```
Season: Winter YY-Summer YY
```

For example: "Season: Winter 25-Summer 26" covers competitions from Winter 2025 through Summer 2026.

Creating a Season

1. In the Presentation Seasons section, click **"New Season"**
2. Choose one of two options:

   Manual Entry:

   - Enter the season name in the format `Season: Winter YY-Summer YY`
   - Click **"Create Season"**

   Auto-Increment:

    - Click **"Auto-Increment Season"**
    - The system creates the next season based on the most recent one

Rules:

- Season names must follow the exact format
- The winter year must be ≤ the summer year
- Only two-digit years (e.g., 25, not 2025)
- Season names must be unique

Setting the Active Season

1. Find the season in the list
2. Click **"Set Active"**
3. Only one season can be active at a time — the previous active season is deactivated automatically

Deleting a Season

1. Click **"Delete"** next to the season
2. Confirm the deletion
3. Seasons with associated competitions cannot be deleted

Managing Competitions

Creating a Competition

1. Click **"New Competition"**
2. Fill in:
    - **Name** — e.g., "October Medal 2025"
    - **Date** — competition date
    - **Type** — Singles or Doubles
    - **Season** — select the presentation season this belongs to
3. Click **"Create Competition"**

Editing a Competition

1. Click **"Edit"** next to the competition
2. Update the fields as needed
3. Click **"Save"**

Note: Changing the competition type after results have been added may cause display issues.

Marking a Competition as Finished

Once all results are entered and verified, you can mark a competition as finished:

1. Click **"Mark as Finished"** on the competition
2. Finished competitions are visually distinguished in the list
3. This status can be toggled if corrections are needed

Deleting a Competition

1. Click **"Delete"** next to the competition
2. Confirm the deletion

3. Competitions with results cannot be deleted until results are removed

Managing Competition Results

Uploading Results via CSV

1. Select the competition from the list
2. Click **"Upload Results CSV"**
3. Select your CSV file
4. Review the preview — check for skipped rows or unexpected data
5. Click **"Confirm Upload"** if the preview looks correct

CSV format for Singles:

```
Position,Player,Gross,Handicap,Nett
1,John SMITH,72,10,62
```

CSV format for Doubles:

```
Position,Player1 / Player2,Gross,Handicap,Nett
1,John SMITH / Jane DOE,,,
```

Player names in doubles must use `/` (space-slash-space) as the separator.

Manual Result Entry

1. Select the competition
2. Click **"Add Result"**
3. Enter:
    - Position (integer)
    - Player name(s)
    - Gross score, handicap, nett score (singles only)
    - Entry paid status
4. Click **"Save Result"**

Editing Results

1. Click **"Edit"** next to the result row
2. Update the fields
3. Click **"Save"**

Deleting Results

1. Click **"Delete"** next to the result row
2. Confirm the deletion

Swindle Money

For competitions where swindle money is paid:

- The system auto-populates swindle money amounts from flagged transactions in the Competition Accounts view
- You can manually enter or override swindle money amounts in the result entry form

- Swindle money is tracked per player per competition

Presentation Night View

This view is used at the end of a season to distribute winnings to competition winners and record general competition costs.

It has two sections:

- **Winnings Distribution** — assign payout amounts to each competition winner for the selected season
- **Competition Costs** — record and review general costs (trophies, engraving, stationery, etc.)

Winnings Distribution

Selecting a Season

1. Use the **"Select Presentation Season"** dropdown at the top
2. Choose the season you want to distribute winnings for
3. The winners table loads automatically

The system remembers your last selected season across page reloads.

The Winners Table

Once a season is selected, the winners table shows one row per competition in that season:

Column	Description
Competition	Competition name
Date	Competition date
Type	Singles or Doubles
Winner(s)	First-place player(s)
Amount (£)	Input field for the payout amount

- Competitions with no recorded winner show "No winner recorded" and the amount field is disabled
- For doubles competitions, both winners are shown

Entering Distribution Amounts

1. For each competition row, enter the payout amount in the **Amount (£)** field
2. Amounts are saved automatically to your browser as you type — you won't lose progress if you navigate away
3. The **Total Distribution** summary at the bottom updates in real time as you enter amounts
4. Enter £0.00 for competitions where a physical prize was given instead of cash

Confirming the Distribution

Once all amounts are entered:

1. Click **"Confirm Distribution"**
2. If any competitions are missing amounts, you'll be warned and can choose to proceed or go back
3. A date picker appears — select the transaction date for the distribution record

4. A final confirmation dialog shows the total amount
5. Click **"Confirm"** to record the distribution

After confirmation:

- The distribution is saved to the database
- The view switches to read-only mode showing the confirmed amounts
- A cost transaction is created automatically

Important: Confirmed distributions cannot be edited. Contact your administrator if a correction is needed.

Clearing Amounts

If you want to start over before confirming:

1. Click **"Clear All"**
2. Confirm the prompt
3. All entered amounts are cleared and the form resets

Read-Only Mode

If a season already has a confirmed distribution, the view loads in read-only mode:

- Amount fields are replaced with the confirmed values (shown in green)
- The Confirm and Clear buttons are hidden
- A status message indicates the distribution is already confirmed

Competition Costs

This section records general costs associated with running competitions — things like trophy engraving, stationery, or equipment purchases. These are separate from the per-competition winnings distribution.

Recording a Cost

1. Fill in the **Record Competition Cost** form:
    - **Description** — e.g., "Trophy Engraving", "Stationery", "Equipment"
    - **Date** — the date the cost was incurred (defaults to today)
    - **Amount (£)** — the cost amount
2. Click **"Record Cost"**
3. A success message confirms the entry and the cost appears in the history table

Notes:

- Descriptions must be unique — you cannot record two costs with the same description
- Amounts must be positive with up to 2 decimal places

Viewing Cost History

The **Competition Cost History** table shows all recorded costs with:

- Date
- Description
- Amount (shown in red)
- Running total at the bottom

Filtering by Date Range

1. Enter a **start date** and **end date** in the filter controls
2. Click **"Apply Filter"** to show only costs within that range
3. Click **"Clear Filter"** to return to the full list

Troubleshooting

Competition Selection Modal Not Appearing

If clicking "Flag for Winnings" does nothing or shows an error:

1. Check the browser console (F12 → Console tab) for error messages
2. Ensure you are in the Competition Accounts view — navigate away and back if needed
3. Verify the transaction data has been loaded (the Transformed Records table should be populated)

Weekly Drill-Down Not Updating After Flag/Unflag

The drill-down should refresh automatically after any flag action. If it doesn't:

1. Click the week row in the summary table again to reload the drill-down
2. If the issue persists, reload the page and re-open the drill-down

CSV Import Errors

"Unexpected column" error:

- Open the CSV in a text editor and verify the header row matches exactly: `Date,Time,Till,Type,Member,Player,Competition,Price,Discount,Subtotal,VAT,Total`

Rows being skipped:

- Check for blank rows or rows with missing required fields
- Ensure dates are in DD-MM-YYYY format

Duplicate records:

- The system detects duplicates during import and skips them
- Review the import summary to see how many rows were skipped

Results CSV Upload Issues

Doubles names not parsing:

- Ensure the separator is exactly `/` (space, forward slash, space)
- Check there are no extra spaces or different slash characters

Positions not recognised:

- Positions must be integers (1, 2, 3 — not "1st", "2nd")

Presentation Night — Season Not Loading

If the winners table fails to load after selecting a season:

1. Ensure competitions exist for that season in the Manage Competitions view
2. Ensure at least some competitions have results entered with a first-place position
3. Check the browser console for API errors

Distribution Confirm Button Disabled or Missing

The Confirm Distribution button only appears when:

- A season is selected
- The season does not already have a confirmed distribution

If the button is missing, the season likely already has a confirmed distribution (read-only mode).

Best Practices

Workflow Order

For best results, follow this sequence each season:

1. **Set up seasons** — Create the presentation season in Manage Competitions
2. **Create competitions** — Add all competitions for the season with correct dates and types
3. **Import transactions** — Import your CSV data in Competition Accounts
4. **Enter results** — Upload or manually enter results for each competition
5. **Flag transactions** — Work through weekly drill-downs to flag prize payments
6. **Distribute winnings** — At season end, use Presentation Night to assign and confirm payouts
7. **Record costs** — Add any competition costs (trophies, etc.) in the Presentation Night view

Naming Conventions

Seasons:

- Always use the exact format: `Season: Winter YY-Summer YY`
- Keep years as two digits

Competitions:

- Include the date or month for uniqueness: "October Medal 2025"
- Keep names under 50 characters
- Avoid special characters

Players:

- Use consistent formatting across all entries: e.g., "John SMITH" not "J. Smith"
- Consistency matters for swindle money auto-population

Data Entry Tips

- Enter results in position order (1, 2, 3...)
- Double-check player names against membership records before saving
- For doubles, always use the `/` separator
- Flag transactions chronologically — start with the earliest week

Flagging Tips

- Work one week at a time using the drill-down view
- If a player name in the transaction doesn't match the competition result, use "Edit Flag" to manually link them
- You can assign £0.00 for physical prizes to keep the records complete

Browser Considerations

- Use the same browser consistently — data is stored server-side but session state is browser-specific
- The application is designed for Chrome, Firefox, Safari, and Edge
- Avoid using private/incognito mode for regular use

Keyboard Shortcuts

- **Escape** — Close any open modal
- **Tab** — Navigate between form fields
- **Enter** — Submit forms or confirm actions
- **F12** — Open browser developer tools for troubleshooting

For additional support or to report issues, contact your system administrator.
